As a professional astrologer who specializes in political astrology. I wish to comment on what to expect from the total solar eclipse of August 21 which crosses the continental USA, a rare event not seen since 1918. President Trump's horoscope is affected strongly by the eclipse occurring on his Mars/ascendant combination, a prominent component of his personality. That should stimulate his Mars desire to take military action, where action has been repeatedly promised. Importantly, Trump's Sun is conjunct The USA horoscopes Mars at $21^{\circ}\text{II}23'$ associated with the military. Those factors made Trump an attractive candidate for the Republican pro military-expansion base. Where? Gemini, II is associated with the local environment and neighbors as opposed to the opposite sign of Sagittarius which is associated with distant countries, for example Cuba and Venezuela as opposed to more distant North Korea or Iran, so it is likely that if he moves militarily it will be against Venezuela and/or Cuba in his zeal to forcefully right the World to the beliefs of his base, which he presumably shares. I predict he will intervene militarily first in Venezuela and it will escalate to an unmanageable E-W crisis which in turn will drastically affect economies worldwide. When? The trigger for events to manifest will probably be quick, timed by the transit of Mars over the eclipse point on September 3.

Postscript:

September 3 brought a very large Hydrogen Bomb test in North Korea which prompted President Trump to renew threats to massively attack North Korea.

September 19 UN speech brought threats to destroy all North Korea.
