

### DIVIDING THE WORLD AT 30° EAST

Border countries like Egypt, Turkey, and Ukraine were divided proportionally by rough estimate. All of Hawaii and 2/3 of Alaska was counted as Eastern land area because it lies west of 150° West. the proposed boundary on the opposite side of the globe from 30° East.

<http://www.earthtrends.wri.org/> agriculture and food: *Arable and permanent cropland*

**Definition:**

*Arable and permanent cropland* is comprised of both arable and permanent cropland in a given country for each year. Data are given in thousands of hectares. Arable land refers to land under temporary crops (double-cropped areas are counted only once), temporary meadows for mowing or pasture, land under market and kitchen gardens, and land temporarily fallow (less than five years). The abandoned land resulting from shifting cultivation is not included in this category. Data for "Arable land" are not meant to indicate the amount of land that is potentially cultivable.

Permanent cropland refers to land cultivated with crops that occupy the land for long periods and need not be replanted after each harvest, such as cocoa, coffee and rubber; this category includes land under flowering shrubs, fruit trees, nut trees and vines, but excludes land under trees grown for wood or timber.
